SENSOR

MOTION SENSOR

The motion sensor automatically turns the lamp on when it registers movement nearby if it's dark.

After activation it lights up for about 40 seconds before it turns back off, unless new movement is registered in the meantime.

5-8 m distance for 40 sec

Lights up by motion when it's dark

LIGHT SENSOR

With the built-in light sensor the lamp is automatically turned on when it gets dark and off again when the sun comes up.

Leave the switch on and the lamp takes care of itself. The light sensor has a time delay so that it doesn't turn on if it's temporarily overshadowed or turns off from a sudden flash of light.

DOUBLE CLICK - 3-STEP DIMMING

Dim your lamps without using a separate dimmer by simply tapping the switch, off-on. This enables you to adapt the light output in anyone of your fixtures – all you need is the switch.

The luminosity can be regulated in three steps. These lamps are not compatible for use with an external dimmer.
